Professional Summary

Data Scientist with 7+ years of experience specializing in machine learning, predictive modeling, and data visualization. Strong background in developing end-to-end ML solutions from concept to production. Expertise in NLP, time series analysis, and recommender systems. Proven track record of delivering data-driven insights that drive business growth and operational efficiency across finance, retail, and healthcare sectors.

Technical Skills

- **Languages & Frameworks**
  Python, R, SQL, TensorFlow, PyTorch, scikit-learn, Pandas, NumPy
- **Infrastructure**
  AWS, Azure, Docker, Kubernetes, Git, MongoDB, PostgreSQL
- **Data Science & ML**
  Machine Learning, Deep Learning, NLP, Time Series Analysis, A/B Testing, Statistical Modeling

Professional Experience

- **Senior Data Scientist** Mar 2021 - Present
  TechInnovate Inc.: AI-powered business intelligence platform *Boston, MA, United States*
  - **Customer Churn Prediction**: Developed and deployed a machine learning pipeline that predicts customer churn with 87% accuracy, resulting in a 23% reduction in customer attrition through targeted retention campaigns
  - **Recommender System**: Architected a hybrid recommender system combining collaborative filtering and content-based approaches, increasing user engagement by 35% and average order value by 18%
  - **NLP Document Classifier**: Built an automated document classification system using BERT, achieving 92% accuracy across 15 document categories, reducing manual processing time by 75%
- **Data Scientist** Jun 2018 - Feb 2021
  FinData Analytics: Financial services data analytics firm *Boston, MA, United States*
  - **Fraud Detection System**: Led the development of a real-time fraud detection system using gradient boosting models and anomaly detection techniques, reducing fraudulent transactions by 63% and saving an estimated $2.5M annually
  - **Market Trend Analysis**: Created time series forecasting models to predict market trends with 82% accuracy, enabling clients to optimize investment strategies and achieve 15% above-benchmark returns
  - **Risk Assessment Tool**: Designed a comprehensive risk scoring system integrating structured and unstructured data sources, improving risk assessment accuracy by 40% and reducing default rates by 28%
- **Data Analyst** Aug 2016 - May 2018
  HealthMetrics: Healthcare analytics company *Boston, MA, United States*
  - **Patient Readmission Predictor**: Developed a predictive model identifying high-risk patients for hospital readmission with 79% accuracy, helping healthcare providers implement targeted interventions that reduced readmission rates by 22%
  - **Medical Image Classification**: Implemented a CNN-based classification system for medical images, achieving 88% accuracy in identifying abnormalities and reducing diagnostic time by 45%

Education

- **M.S. in Data Science** Sep 2014 – May 2016
  Massachusetts Institute of Technology *Boston, MA, United States*
- **B.S. in Computer Science, Minor** Sep 2010 – May 2014
  University of California, Berkeley *Boston, MA, United States*

Awards and Honors

- **Best Paper Award** — Dec 2022
  International Conference on Machine Learning Applications | *Advanced Techniques in Time Series Forecasting* — *Online*
- **Kaggle Competition - Top 5%** — Mar 2020
  Kaggle | *Customer Segmentation Challenge* — *Online*

Certifications

- **AWS Certified Machine Learning - Specialty** — Sep 2022
  Certificate — *Amazon Web Services*
- **Professional Certificate in Data Science** — Jun 2019
  Certificate — *Harvard University (edX)*
