Professional Summary

Data Scientist with 7+ years of experience specializing in machine learning, predictive modeling, and data visualization. Strong background in developing end-to-end ML solutions from concept to production. Expertise in NLP, time series analysis, and recommender systems. Proven track record of delivering data-driven insights that drive business growth and operational efficiency across finance, retail, and healthcare sectors.

TECHNICAL SKILLS

• Languages & Frameworks

Python, R, SQL, TensorFlow, PyTorch, scikit-learn, Pandas, NumPy

• Infrastructure

AWS, Azure, Docker, Kubernetes, Git, MongoDB, PostgreSQL

• Data Science & ML

Machine Learning, Deep Learning, NLP, Time Series Analysis, A/B Testing, Statistical Modeling

Professional Experience

• Senior Data Scientist

Mar 2021 - Present

TechInnovate Inc.: AI-powered business intelligence platform

Boston. MA

- Customer Churn Prediction: Developed and deployed a machine learning pipeline that predicts customer churn with 87% accuracy, resulting in a 23% reduction in customer attrition through targeted retention campaigns
- Recommender System: Architected a hybrid recommender system combining collaborative filtering and content-based approaches, increasing user engagement by 35% and average order value by 18%
- NLP Document Classifier: Built an automated document classification system using BERT, achieving 92% accuracy across 15 document categories, reducing manual processing time by 75%

• Data Scientist

Jun 2018 - Feb 2021

FinData Analytics: Financial services data analytics firm

New York, NY

- Fraud Detection System: Led the development of a real-time fraud detection system using gradient boosting models and anomaly detection techniques, reducing fraudulent transactions by 63% and saving an estimated \$2.5M annually
- Market Trend Analysis: Created time series forecasting models to predict market trends with 82% accuracy, enabling clients to optimize investment strategies and achieve 15% above-benchmark returns
- Risk Assessment Tool: Designed a comprehensive risk scoring system integrating structured and unstructured data sources, improving risk assessment accuracy by 40% and reducing default rates by 28%

• Data Analyst

Aug 2016 - May 2018

HealthMetrics: Healthcare analytics company

Chicago, IL

- Patient Readmission Predictor: Developed a predictive model identifying high-risk patients for hospital readmission with 79% accuracy, helping healthcare providers implement targeted interventions that reduced readmission rates by 22%
- Medical Image Classification: Implemented a CNN-based classification system for medical images, achieving 88% accuracy in identifying abnormalities and reducing diagnostic time by 45%

EDUCATION

• M.S. in Data Science

Sep 2014 - May 2016

Massachusetts Institute of Technology

Cambridge, MA

• B.S. in Computer Science, Minor in Statistics

Sep 2010 - May 2014

University of California, Berkeley

Berkeley, CA

AWARDS AND HONORS

Dec 2022 • Best Paper Award

International Conference on Machine Learning Applications | Advanced Techniques in Time Series Forecasting Online

• Kaggle Competition - Top 5%

Mar 2020Kaggle | Customer Segmentation Challenge On line

CERTIFICATIONS

• AWS Certified Machine Learning - Specialty Certificate

Sep 2022 Amazon Web Services

• Professional Certificate in Data Science Certificate

Jun 2019 $Harvard\ University\ (edX)$
